Front End Developer / UI UX Designer

Summary

I am a dreamer and a fanatic of all digital things. I've been coding for the last 3 years and I love it. I graduated as a Software Engineer. I have developed a lot of websites and web applications using a combination of Front End technologies. During my old days, I used HTML, CSS, JavaScript, React Js Bootstrap, tailwind, saas, laravel, and Adobe Xd, Figma tools & framework for building & Designing web apps and websites. Looking for an entry into a highly professional organization with a Competitive environment, where I can use my knowledge and skills to achieve the organization's goals and also get opportunity to learn new technologies.
